Introducing the revolutionary new T-BOX torque and angle instrument

McCann Equipment Limited, Canada's largest Torque Tool Distributor, is pleased to announce the introduction of the NORBAR "T-BOX", torque and angle display instrument.

McCann Equipment Limited, with five ISO Accredited facilities located across Canada, offers tool and instrument recalibration services to original factory standards.

For additional information on the new "T-BOX", or for any of the products sold and serviced by McCann Equipment Limited, please contact the nearest branch office.

- Touch screen technology
- Easy to use on screen icons
- Hand held portable or bench mounted device
- 'Plug and Play' with Norbar SMART transducers

"The revolutionary new T-BOX will become your instrument of choice for the measurement and collection of torque data."

T-Box features a colour 5.7" (145mm) touch screen LCD display with graphic on screen icons for simple tool selection. Feature modes include Click, Hydraulic, Pulse and Stall tools that enable the most common torque products to be tested by a simple touch of the screen.

T-Box also features a new "Pulse Tool Mode" which uses a mathematical algorithm to accurately determine the output torque from impulse tools.

T-Box comes pre-loaded with Tool Templates for the entire Norbar product range of Torque Wrenches and Pneutorques® enabling the user to simply assign individual tools to perform calibrations to the relevant ISO standard. Other tool templates can be created by the operator.

Graphical analysis and display of joint profiles available using the Graph Mode.

T-Box can connect up to 4 Smart Transducers including transducers with angle capabilities for instant connectivity. Alternatively, non-Norbar transducers with a mV/V output can be programmed into the T-Box memory.

T-Box has 2 USB ports, one RS232 serial port and an ancillary connection (RS232 and USB cables supplied as standard).

T-Box is supplied with Norbar's new Torque Data Management System software (TDMS) for complete tool data management and archiving on your PC.

TDMS enables data to be viewed graphically, in an SPC format, or as a Calibration Certificate (available in English, French, German, Italian, Spanish and Russian).

T-Box contains a large capacity memory that will enable a user to collect data and store in excess of 100,000 individual test results directly to the instrument and then synchronize to the TDMS software.
